# BIK HUB CHALLENGE ON HACKYEAH 2021

10-12 December 2021

As part of BIK HUB activities, the BIK Group will participate in **Hackathon Hack Yeah 2021** as a **Path Partner/Partner of the task HackYeah! 2021**.

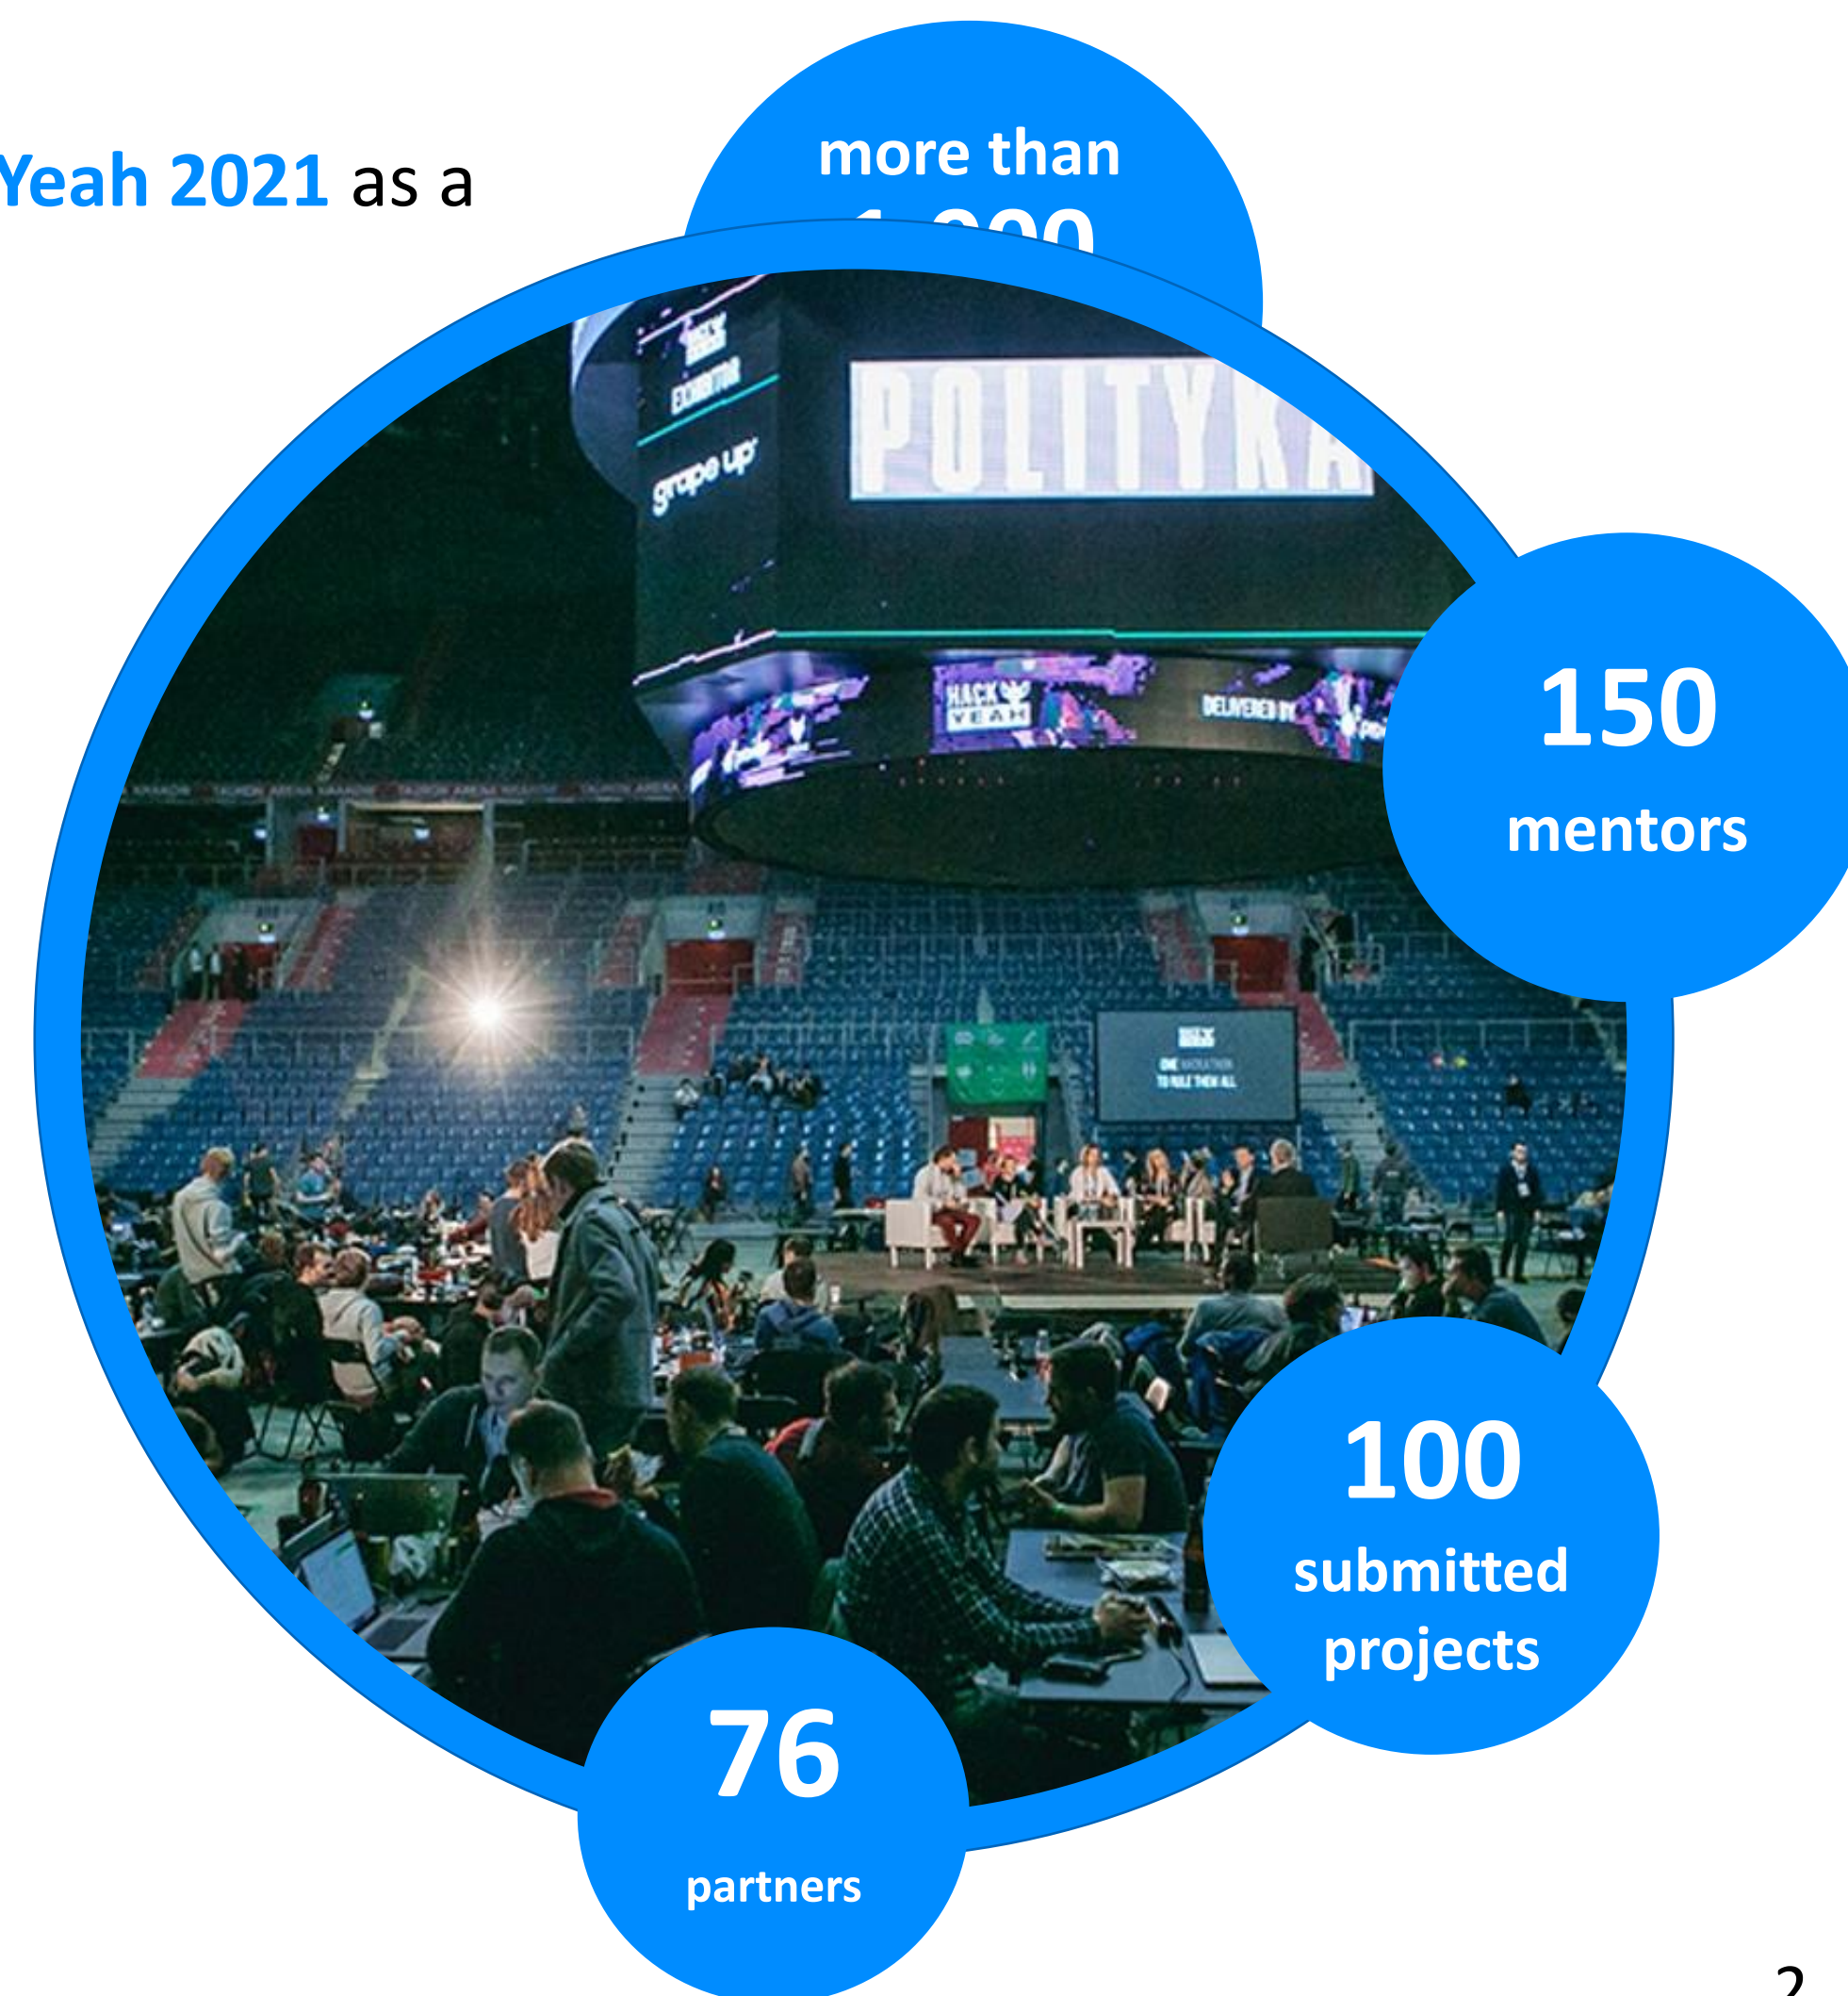

Event participants will have the opportunity to face our challenge, our thematic path.

This event is **Europe's largest hackathon**.

Last year, over 1,900 software developers worked on solutions in 5 categories.

The result of these activities was **the completion of about 100 innovative competition projects**.

**We are counting on feedback** regarding the current initiative – the BIK Open API pilot

- Are the services offered attractive?
- What data/services should we extend BIK Open API by before production launching?

**Other groups of services**

- Services enabling location search based on parameters given
- What other services should we offer in this model?

**Potential directions of further BIK HUB initiatives**

- Behavioural biometrics
- Blockchain
- Modern ideas for data visualisation.
- Data integration
- Solutions that improve the online safety of our users

# THANKS TO PROTOPIA

Technological Partner

If we had to use just one word to describe what **Protopia** is, we would say “progress”. To be more specific: **self-improvement, change for the better, constant striving for perfection.**

**Protopia** experts have been becoming part of the transformation process, taking the role of mentors and advisers. They want to train people and teach them how to turn endpoint thinking into travel thinking.

The ultimate goal is to follow the continuous improvement of your team, department or application, instead of handing over a closed, future-free
